eGov Project

Automated system for management of international cargo transport licenses

Increased transparency and fairness in the allocation and usage of international transport licenses

<http://dozvoli-mtc.gov.mk>

Purpose

Significantly reduce the administrative burden on truckers and Ministry of Transport and Communication alike and put end to a distribution system that has been perceived as non-transparent, subjective and corruptive.

The system automatically checks all information relevant for calculating the number of licenses for the applicants and distributes the available licenses based on strictly determined formula and criteria. It also enables comprehensive monitoring of the licenses usage throughout the calendar year.

Application functionalities

- All applications submitted electronically
- The system automatically checks all information against other data bases
- Automated evaluation of the applications and allocation of licenses
- Monitoring of the licenses usage
- Complete automation of the Ministry back office
- Periodic re-distributions of licenses based on the usage
- Updated database of all transport companies

Users

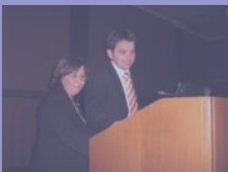

- More than 3,000 transport companies registered in the Republic of Macedonia
- Ministry of Transport and Communications

Specific Benefits

- Increased efficiency and transparency of MoTC in the process of allocating transport licenses
- Significantly reduced possibilities for corruption in the distribution process
- Less time and people needed in the Ministry to handle the applications and to do the evaluation/allocation process
- Maximum optimal use of the pool of licenses available for Macedonian transporters
- Increased confidence of the transporters in the distribution process

Status

Three annual distributions carried out through the system, in 2006, 2007 and 2008. Comprehensive monitoring of the licenses usage operative since August 2008. The system is mandatory for all transporters in Macedonia and the Ministry of Transport and Communications.

The Minister of Transport and Communications starts the electronic distribution in the presence of all truckers, demonstrating transparency.
