eGov Project

# e-Budgeting

## Modernization of the national budgeting process

### Purpose

The application enables modern and efficient electronic process for preparation of the national budget and the monitoring of its execution.

### Application functionalities

The system covers the overall process of preparation of the Budget of the Republic of Macedonia which includes:

- **Preparation of the budget circular** - The Department of Budgets and Funds can develop the e-Budget circular for each budget cycle.
- **Preparation of the budget requests** - Budget users can prepare and submit their budget requests electronically.
- **Simulations** - Offers the possibility to run various scenarios of the budget – “*what if*” options.
- **Preparation, adoption and execution of the budget.**

### Users

The primary user is the Ministry of Finance. In addition, all budget users/ government institutions will be using the application for secure and timely on-line submission of the annual budget requests to the Ministry.

### Specific benefits

For the Ministry of Finance and the government institutions included:

- More efficient and standardized work procedures
- Quicker process with improved transparency
- Better analysis and planning of the Budget
- Monitoring of the spending
- Improved transparency and communication between all budget users

For the citizens:

- Better planning and spending of the Macedonian tax payers money

### Status

The system was completed and installed in the Ministry of Finance June 2007. National budgets for 2008 and 2009 have been prepared and submitted to the Parliament in a much more efficient manner compared to the past.
